

# CURRICULUM VITAE

## PHP Web Developer and designer

### Why the search for new job

#### For the challenge and vision

As a professional web developer, I know the future of business is the internet. And I just love that!, I want to challenge myself and be able to use my skills to capacity, in order to do that; I need an innovative environment to set new heights for web services. A company with a vision of that, I would be proud to be part of it.

I dream big and I need support, motivated dreams make things happen and I can help make things happen.

### My Experience

#### OOP PHP, Laravel, HTML5, CSS3 and JS type of guy

4+ years experience in web development career, my last project is [ToadCareers](#), a recruitments system, written with Laravel 4, system contains login module for both admin/recruiter and applicants with registration module, applicants have dashboard with their full profile page, vacancies panel where they can apply and track their applicant status. Admin panel where they can post/edit jobs and track each job's applicants with one click status update, filter and view applicants uploaded resume or system generated resume. PHP and Bootstrap, for more: <http://bit.ly/1H6JNz6>

One of my popular PHP MySQL systems was an online schools management system, with modules for pupil's registration, class seating, parent's portal, examination schedule creation, courses results, finance management, warehouse, teacher's management module and more, more than 20 school has been using the system. Built in Laravel MVC with twitter bootstrap responsive framework

In my current job, one of my PHP projects is company's careers system. With full user profile and resume upload, management and analysis module, job posting and administration module. It receives an average of 20K views per month with 50K+ registered account.

### Why Me

#### Passion and drive

My education and experience has prepared me to work for multinational company. Web development is not only my career, it's my passion; I quit networking career for it, making me both excited and driven at the prospect of working with a team of creative, talented and enthusiasts web developers and designers. The web is growing; and my experience and ideas can help.

Sincerely,

**Mutaz Hameed**
